## BENEFITS & FEATURES:

- Quick, easy, clean & reusable!
- HACCP & USFDA certified.
- No preparation - packaged ready for freezing.
- High quality seals - no risk of spoilage.
- Cost & time saving.
- Flexible when frozen.
- Formulated gel lasts longer than ice.
- Multi-cell construction spreads chill evenly.
- Multi-layer film provides high puncture resistance.

## THE MOST EFFECTIVE AND RELIABLE GEL ICE PACK FOR MORE THAN A DECADE!

Increasingly stringent food safety & quality standards have made it even more essential that high value products, such as seafood & produce are maintained at a consistent chill temperature during & after transit.

Thermoshield ice packs are filled with a specially formulated, food-safe, non-toxic gel that lasts longer than conventional ice packs. This provides an assurance that your products are protected against unexpected delays in transit times.

Thermoshield ice packs are segmented and flexible & packed into ventilated cartons for faster freezing. The Thermoshield transit chill system will keep your costs and temperatures down.
