# HOW TO CHOOSE THE BEST PALLET WRAP FOR YOUR BUSINESS

Selecting the best pallet wrap for your business can be a real game changer. The right pallet wrap can help you reduce costs, waste, environmental impact, customer claims, workplace injuries while significantly boosting productivity.

Follow our simple guide to determine the best pallet wrap for your business.
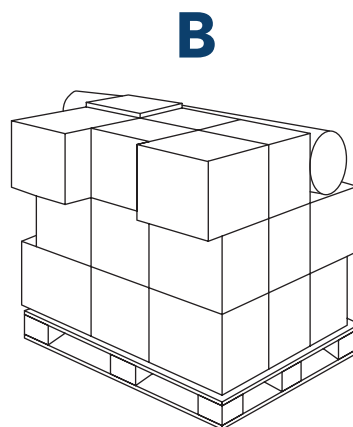

STEP 1

DETERMINE THE PALLET LOAD TYPE

The first thing to consider is what type of load you will be wrapping. Stretch wrap and pallet machine manufacturers divide pallet loads into three main categories. This is based on load stability, difficulty of wrapping and the amount of protrusions.
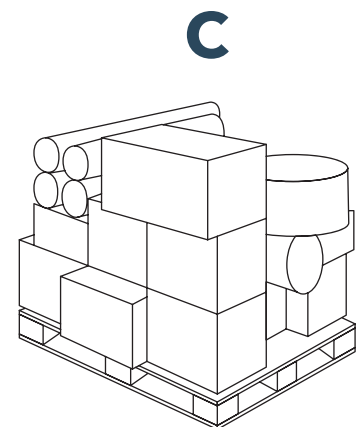

A   **B**   **C**

TYPE **A** LOADS

- Uniform in shape with no protrusions.
- Straight sides with few potential puncture points.
- Single product or multiple products with identical packaging.

TYPE **B** LOADS

- Contains irregular shaped products or load size does not match pallet size.
- Several potential puncture points.
- Contains 2-3 different shaped products.

TYPE **C** LOADS

- Contains different products of varying shapes and sizes.
- Difficult to wrap because no two loads are the same.
- Several puncture points.

STEP 2

DETERMINE THE PALLET LOAD WEIGHT & SIZE

IF YOU WORK WITH TYPE **A** LOADS

Depending on the weight of the pallet load, a high-quality, thinner gauge film works best with type A loads. Refer to the pallet wrap type, weight and dimensions below to find your ideal Wrapex® product.

Up to 400kg
Recommended Product: **55501**
Wrap Type: **Hand**
Wrap Thickness: **12μm**
Wrap Dimensions: **500mm x 550m**
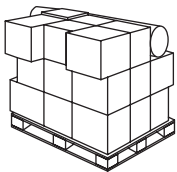

Up to 800kg
Recommended Product: **55503**
Wrap Type: **Hand**
Wrap Thickness: **17μm**
Wrap Dimensions: **500mm x 350m**

Up to 600kg
Recommended Product: **55502**
Wrap Type: **Hand**
Wrap Thickness: **15μm**
Wrap Dimensions: **500mm x 450m**

Up to 800kg
Recommended Product: **55617**
Wrap Type: **Machine**
Wrap Thickness: **17μm**
Wrap Dimensions: **500mm x 1920m**

## IF YOU WORK WITH TYPE **B** LOADS OR A COMBINATION OF **A** & **B** LOADS

Depending on the weight of the pallet load, a high-quality, mid-gauge film will work best with type B loads. Refer to the pallet wrap type, weight and dimensions below to find your ideal Wrapex® product.

Up to 1000kg
Recommended Product: **55505**
Wrap Type: **Hand**
Wrap Thickness: **20μm**
Wrap Dimensions: **500mm x 450m**

Up to 1000kg
Recommended Product: **55620**
Wrap Type: **Machine**
Wrap Thickness: **20μm**
Wrap Dimensions: **500mm x 1630m**

IF YOU WORK WITH TYPE **C** LOADS OR A COMBINATION OF **ALL 3 LOADS**

Type C loads require a strong, high-quality stretch film that provides tough resistance against punctures. Refer to the pallet wrap type, weight and dimensions below to find your ideal Wrapex® product.

Up to 600kg
Recommended Product: **55503**
Wrap Type: **Hand**
Wrap Thickness: **17μm**
Wrap Dimensions: **500mm x 350m**

Up to 600kg
Recommended Product: **55620**
Wrap Type: **Machine**
Wrap Thickness: **20μm**
Wrap Dimensions: **500mm x 1630m**

Up to 1100kg
Recommended Product: **55507**
Wrap Type: **Hand**
Wrap Thickness: **23μm**
Wrap Dimensions: **500mm x 400m**
Usage: **Ideal for taller, less stable and heavier loads**

Up to 1100kg
Recommended Product: **55623**
Wrap Type: **Machine**
Wrap Thickness: **23μm**
Wrap Dimensions: **500mm x 1420m**
Usage: **Ideal for taller, less stable and heavier pallet loads**
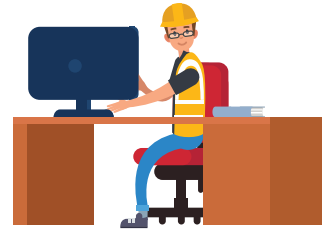

Up to 1300kg
Recommended Product: **55510**
Wrap Type: **Hand**
Wrap Thickness: **25μm**
Wrap Dimensions: **500mm x 400m**
Usage: **Our thickest film gauge. Requires maximum exertion during hand application**

Up to 1300kg
Recommended Product: **55625**
Wrap Type: **Machine**
Wrap Thickness: **25μm**
Wrap Dimensions: **500mm x 1305m**
Usage: **Our thickest film gauge.**
